Office Action Summary	Application No. 10/042,357	Applicant(s) ONG ET AL.	
	Examiner Duc Truong	Art Unit 1711	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The last office action is hereby withdrawn in view of Applicant's arguments. However, a new ground of rejection is cited herein based on the IDS submitted on

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2—33 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 0402269 of record on 1449.

The reference discloses polythiophenes of the general formulas (figures IA, IB, IC , and IE) with so many variations on page 5.

Note that the reference further discloses the formula I , which can be read on the formula of claim2 and claim 21.

The reference further discloses processes to form the products of the claimed formulas (see example 1, claims 1,2, 4-6).

The disclosure of the reference differs from the instant claims in that it does not disclose all of the claimed formulas and the use of specific catalyst in claim 29.

However, it does disclose the broad formulas with so many variations, and the use of ferric chloride in example 1, corresponding to this in claim 28.

Therefore, it would have been obvious to one of ordinary skill in the art to modify the variations of the formulas from the reference within the limitations of the instant claims since they have been shown to be effective in a similar system and thus would have

Art Unit: 1711

been expected to provide adequate results. There is no showing of unexpected results derived from said use.

Claims 2-4 rejected under 35 U.S.C. 103(a) as being unpatentable over WO 9415368 or SATO or VAN HUTTEN, they are of record on 1449.

WO 9415368 discloses block copolymer of polythiophenes and derivatives (see claims 10-20; figure 7, examples , page 10, line 17, page 11, line 33.

SATO discloses the preparation of long alkyl-substituted oligothiophenes, see formulae 1-4.

VAN HUTTEN discloses the structure of thiophene based regioregular polymers and block copolymers and its influence of luminescence spectra, see figure 3.

The disclosures of the references differ from the instant claims in that they do not disclose all of the claimed formulae. However, they do disclose specific formulae which are included in the broad teachings of the claims. Therefore, it would have been obvious to one of ordinary skill in the art to modify the formulae and the variations from its formulae within the limitations of the instant claims to get the polythiophenes of the claimed formulae in the absence of a showing of unexpected results derived from said use.

Claims 5,7,9-12,19,20,29 and 33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 5 and 11 recite the limitation "m" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim s 7,9,10,19,20 and 33 recite the limitation "A" in line 2. There is insufficient antecedent basis for this limitation in the claim.

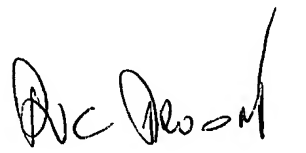

Claim 12 recites the limitation "x,y,z" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 29 recites the limitation "IIIb" in line 2. There is insufficient antecedent basis for this limitation in the claim.
